

STENCIL PRINTING BASICS COURSE

Online Training Course

Course ID: SP101E

ITW EAE Learning

Our eLearning courses are specifically designed to provide engaging and interactive learning opportunities for operators, technicians, engineers and/or managers to be introduced to or build upon the knowledge and skills needed to successfully operate, maintain, program, or troubleshoot their MPM Momentum equipment. Online courses are designed to cover beginning and intermediate competencies and should be mastered before considering more advanced, in person training. Courses require a reliable internet connection and can be viewed at your own pace on your phone, tablet, or pc laptop.

Course Overview:

In this module, you will get an introduction to printing basics. You will learn where stencil printing is used, and learn about the four keys of stencil printing, as well as additional components in stencil printers that are important to the printing process.

Who Should Take this Course:

Anyone who has an interest in stencil printing or plans to be in the profession.

Time Requirements: Approximately 30 minutes **Assessments:** Quiz

Learning Objectives:

- Explain how printers are used.
- Name the four keys of stencil printing and explain how they are related to each other in the printing process.
- Explain the importance of tooling.
- Explain how the vision system works.
- Explain the function of the wiper system.
- Explain the function of the conveyor system.
